BOLT HEAD IDENTIFICATION

The markings on the head of a bolt can help ID its grade and manufacturer. The grade is usually represented by hashmarks or a number. Manufacturer ID's are usually initials or a custom logo designated for their use only.

PAINTING SERVICES

FASTENER PAINTING

- Can run many sizes and colors at the same time
- Diameters: #4 thru 3/8
- Lengths: Up to 3"
- Add Neoprene or detachable washers
- Powder Coating
- ISO:9000 Compatible
- Screws, Blind Rivets, Nuts, Washers
- Must be clean - free of oil or wax
- Pantone Colors - Anything under the rainbow
- Any Finish - From high gloss to flat
- Metallic and UV resistant also available
- Polyurethane or Waterborne

BENEFITS OF PAINTING...

- Painting offers a seamless look to your project, helping the fastener blend in to the surrounding surface.
- It also offers corrosion and rust resistance, so your fastener will last longer when exposed to the elements.

TYPES OF FASTENERS

- Screws
- Bolts
- Washers
- Rivets
- Nails

COMMON APPLICATIONS

- Rain Gutters
- Metal Roofing
- Electrical Projects
- Decking
- Carpentry
- Truck & Trailer
- Vinyl Fencing

PLATING REFERENCE

NICKEL ELECTROPLATE

- Decorative silver appearance
- Good wear
- Mild corrosion resistance - for indoor use

ZINC ELECTROPLATE

- Bright blue or white appearance
- Moderate corrosion resistance - for suburban use

ZINC MECHANICAL PLATE

- Similar in appearance to electroplate
- Less susceptible to hydrogen embrittlement
- Moderate corrosion resistance - for suburban use

ZINC ELECTROPLATE - YELLOW CHROMATE

- Thicker conversion than clear
- Severe corrosion resistance - for industrial use

ZINC ELECTROPLATE - OLIVE DRAB CHROMATE

- Thicker coating than yellow
- Severe corrosion resistance - for industrial use

ZINC MECHANICAL - BRIGHT CHROMATE

- Thin bright conversion coating
- Can be dyed for paint bonding
- Moderate corrosion resistance - for suburban use

ZINC MECHANICAL - YELLOW CHROMATE

- Thicker conversion than clear
- Increased corrosion resistance - for industrial use

ZINC MECHANICAL - OLIVE DRAB CHROMATE

- Thicker coating than clear
- Increased corrosion resistance - for industrial use

ZINC MECHANICAL - CHROMATE + ORGANIC

- Additional organic (cured) coating
- Increased corrosion resistance - for industrial use

BLACK OXIDE + OIL

- Porous & thin
- Mild corrosion resistance - for indoor use

BRASS PLATE - LACQUERED

- Decorative electroplated finish
- Mild corrosion resistance - for indoor use

CHROMIUM ELECTROPLATE

- Bright lustrous blue / white finish
- Mild corrosion resistance - for indoor use

AL-1000 COATING

- Recommended on parts where stress and corrosion are a problem
- Uniform decorative finish
- No hydrogen embrittlement
- Excellent solvent & corrosion resistance
- Hard, durable coating will take abuse without chipping or scratching Can be applied to Carbon Steel, Alloy Steel, Stainless Steel, Titanium, and Aluminum Alloys.

JS-1000 COATING

- Proven to remain 100% rust free in over 1000 hours of salt spray testing
- High lubricity for reduced tapping torque
- Hexavalent Chromium Free and RoHS compliant
- Completely non-toxic & environmentally friendly
- Can be powder coated for color match which also increases rust resistance

AL-2000 COATING

- No electrochemical or chemical atmosphere corrosion
- Excellent corrosion and solvent resistance
- Uniform decorative finish in black, silver & gold
- Absolutely no hydrogen embrittlement

COPPER ELECTROPLATE - LACQUERED

- Bright decorative finish
- Electrically Conductive
- Mild corrosion resistance - for indoor use

CHROMIUM ELECTROPLATE - COPPER & NICKEL UNDERCOAT

- Surface is hard and abrasive resistant
- Primarily for decorative use
- Mild corrosion resistance - for indoor use

HOT DIP ZINC MECHANICAL GALVANIZED

- Dark grey, very thick coating
- Severe corrosion resistance - for industrial use

WHAT IS...

Conversion Coating

A chemical reaction converts part of the metal surface into the coating.

Hydrogen Embrittlement

The accidental introduction of hydrogen into the metal reduces tensile strength of material which could lead to fractures or cracks in the fastener.

RoHS Compliant

Stands for: Restrictions of Hazardous Substances. It restricts use of 10 hazardous materials found in electrical and electronic products.
